Property: SMPLE - Sample Property
 Month: September 2005

Month	Usage	Usage/Day	NACR
September 04	813	27.10	99.14 %
September 05	923	30.77	98.60 %

EkoPLC provides secure broadband technologies speed, security, support, and satisfaction to customers and end users. to more than 2,100 hotels and conference centers worldwide.
 Our patented technology and managed network provide

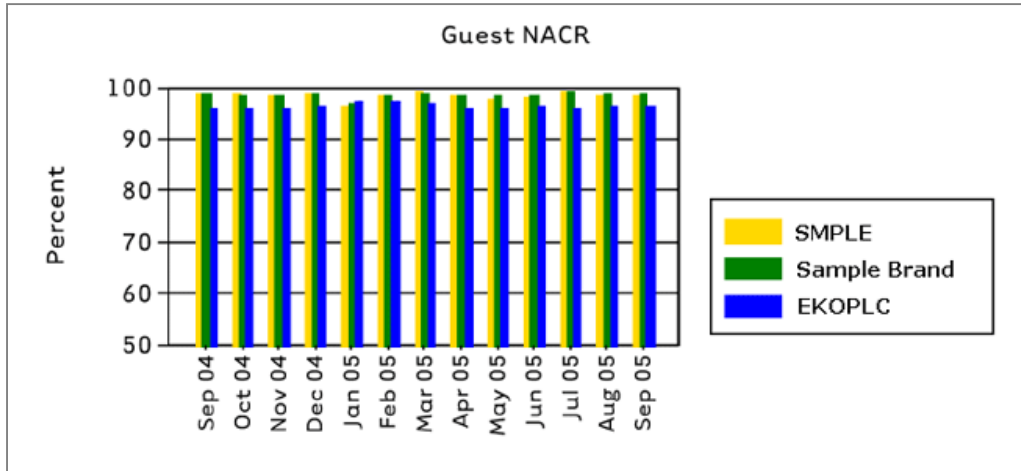

GUEST USAGE

This graph represents the number of guest connections during the month (wired and wireless) and compares it with other properties of your brand and all EKOPLC-enabled hotels. As use increases, so can property revenue and guest satisfaction.

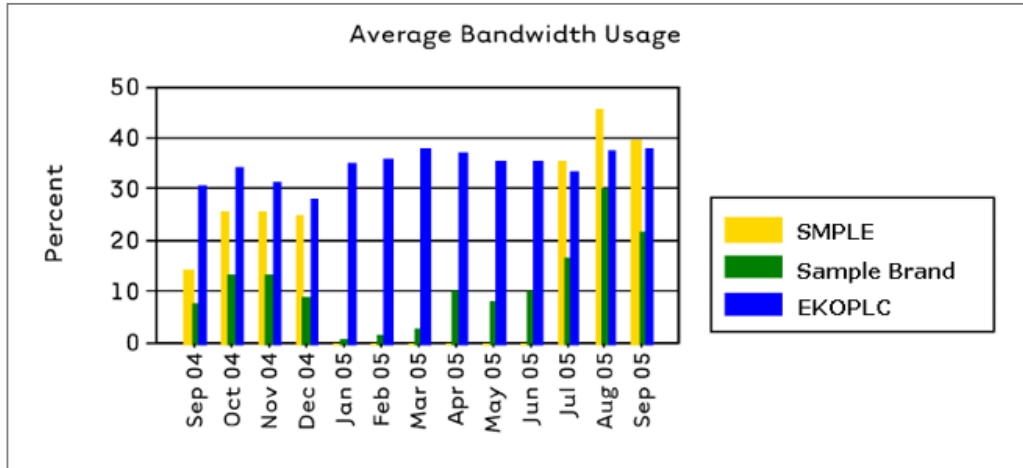

GUEST NACR

Guest NACR (Non-Assisted Connect Rate) is the percentage of guests that connect without generating guest support calls. The higher the NACR, the fewer the support calls and the more satisfied your guests are.

AVERAGE BANDWIDTH USAGE

Knowing how much bandwidth your hotel uses can mean the difference between satisfied and dissatisfied guests. This chart reflects the average bandwidth used by month in your hotel. Average usage higher than 60% can compromise the guest experience.

CONFERENCE GROSS REVENUE

Conference revenue can add substantially to your bottom line. This chart indicates the approximate gross revenue in Euros for all conferences held during the month in your hotel.
